

HYDROMODELHOST

Smart Groundwater Resources Management

Mikel Irizar, CEO

mikel.irizar@hydromodelhost.com

<http://www.hydromodelhost.com>

About us

- More than 60 years of combined experience in groundwater management
- 100% focused on developing groundwater management technology
- (R)evolutionizing groundwater resources planning and management by introducing new technologies
- Enabling proactive and participatory groundwater management

**PROVIDING GROUNDWATER
VISIBILITY AND PREDICTABILITY**

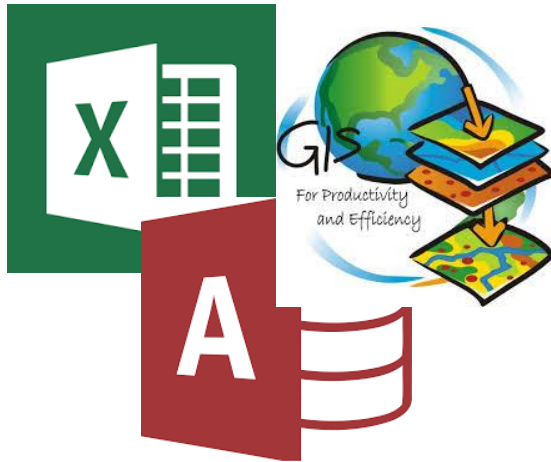

Current situation – technology not addressing

Economic, environmental and political impact

The problem: current technology limitations

Scattered data

Groundwater Models are critical but...

Lack of common DSS

Hydromodel Host IGWM™ framework

The solution

- Data Management
 - Real-time data access
 - Advanced statistical functionality
 - Exporting capabilities
- Aquifer resources management
 - Budget management
 - 3D views
 - Automated model updating
- Sustainability management
 - “What-if” scenarios
 - Sensitivity analysis
- Transparency / Collaboration
 - Harmonized data sources
 - Common decision support framework

Solution – unique technology

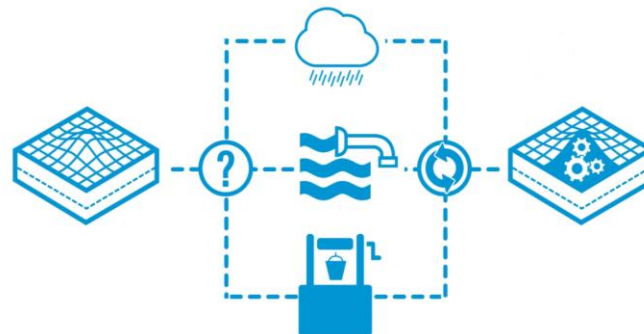

- ✓ Cloud based platform integrating assets needed to support gw sustainability

- ✓ Automated groundwater and surface water model updating in the cloud

- ✓ Easily run complex “what-if” scenarios and sensitivity analysis in the cloud
