JORGE A. ARROYO P.E.

B. Sc. Civil Engineering, University of Costa Rica M. Sc. Construction Management, Loughborough University, England TEXAS WATER DEVELOPMENT BOARD Water Science and Conservation Innovative Water Technologies

Jorge Arroyo directs the Texas Water Development Board Innovative Water Technologies Division, a group dedicated to the advancement of innovative water supplies in Texas through research, demonstration projects and educational outreach efforts.

Mr. Arroyo began his career as a Civil Engineer in Costa Rica working for the Costa Rican Water Institute and, later, for the United States Agency for International Development. He is a graduate of the University of Costa Rica and of Loughborough University in England. In 2006 he received the International Desalination Association inaugural fellowship award to conduct research under the auspices of the Singapore Public Utilities Board.

The mission of the Texas Water Development Board is to provide leadership, planning, financial assistance, information, and education for the conservation and responsible development of water for Texas.
