

**EXPLANATION**

- 2000  
Well used for control
- Number indicates altitude of water level in the Edwards-Trinity (Plateau) Aquifer in feet above mean sea level
- Water-level measurements made on various dates during the six year period 1965-70
- 2500 —  
Line showing approximate altitude of water level in the Edwards-Trinity (Plateau) Aquifer
- Dashed where control is absent or limited
- Interval is 100 feet
- Datum is mean sea level
- TTTTTTTT  
Water level is in the Edwards and associated limestones within the hatched lines

Base compiled from series of topographic maps, scale, 1:250,000 produced by the U.S. Army Map Service
