

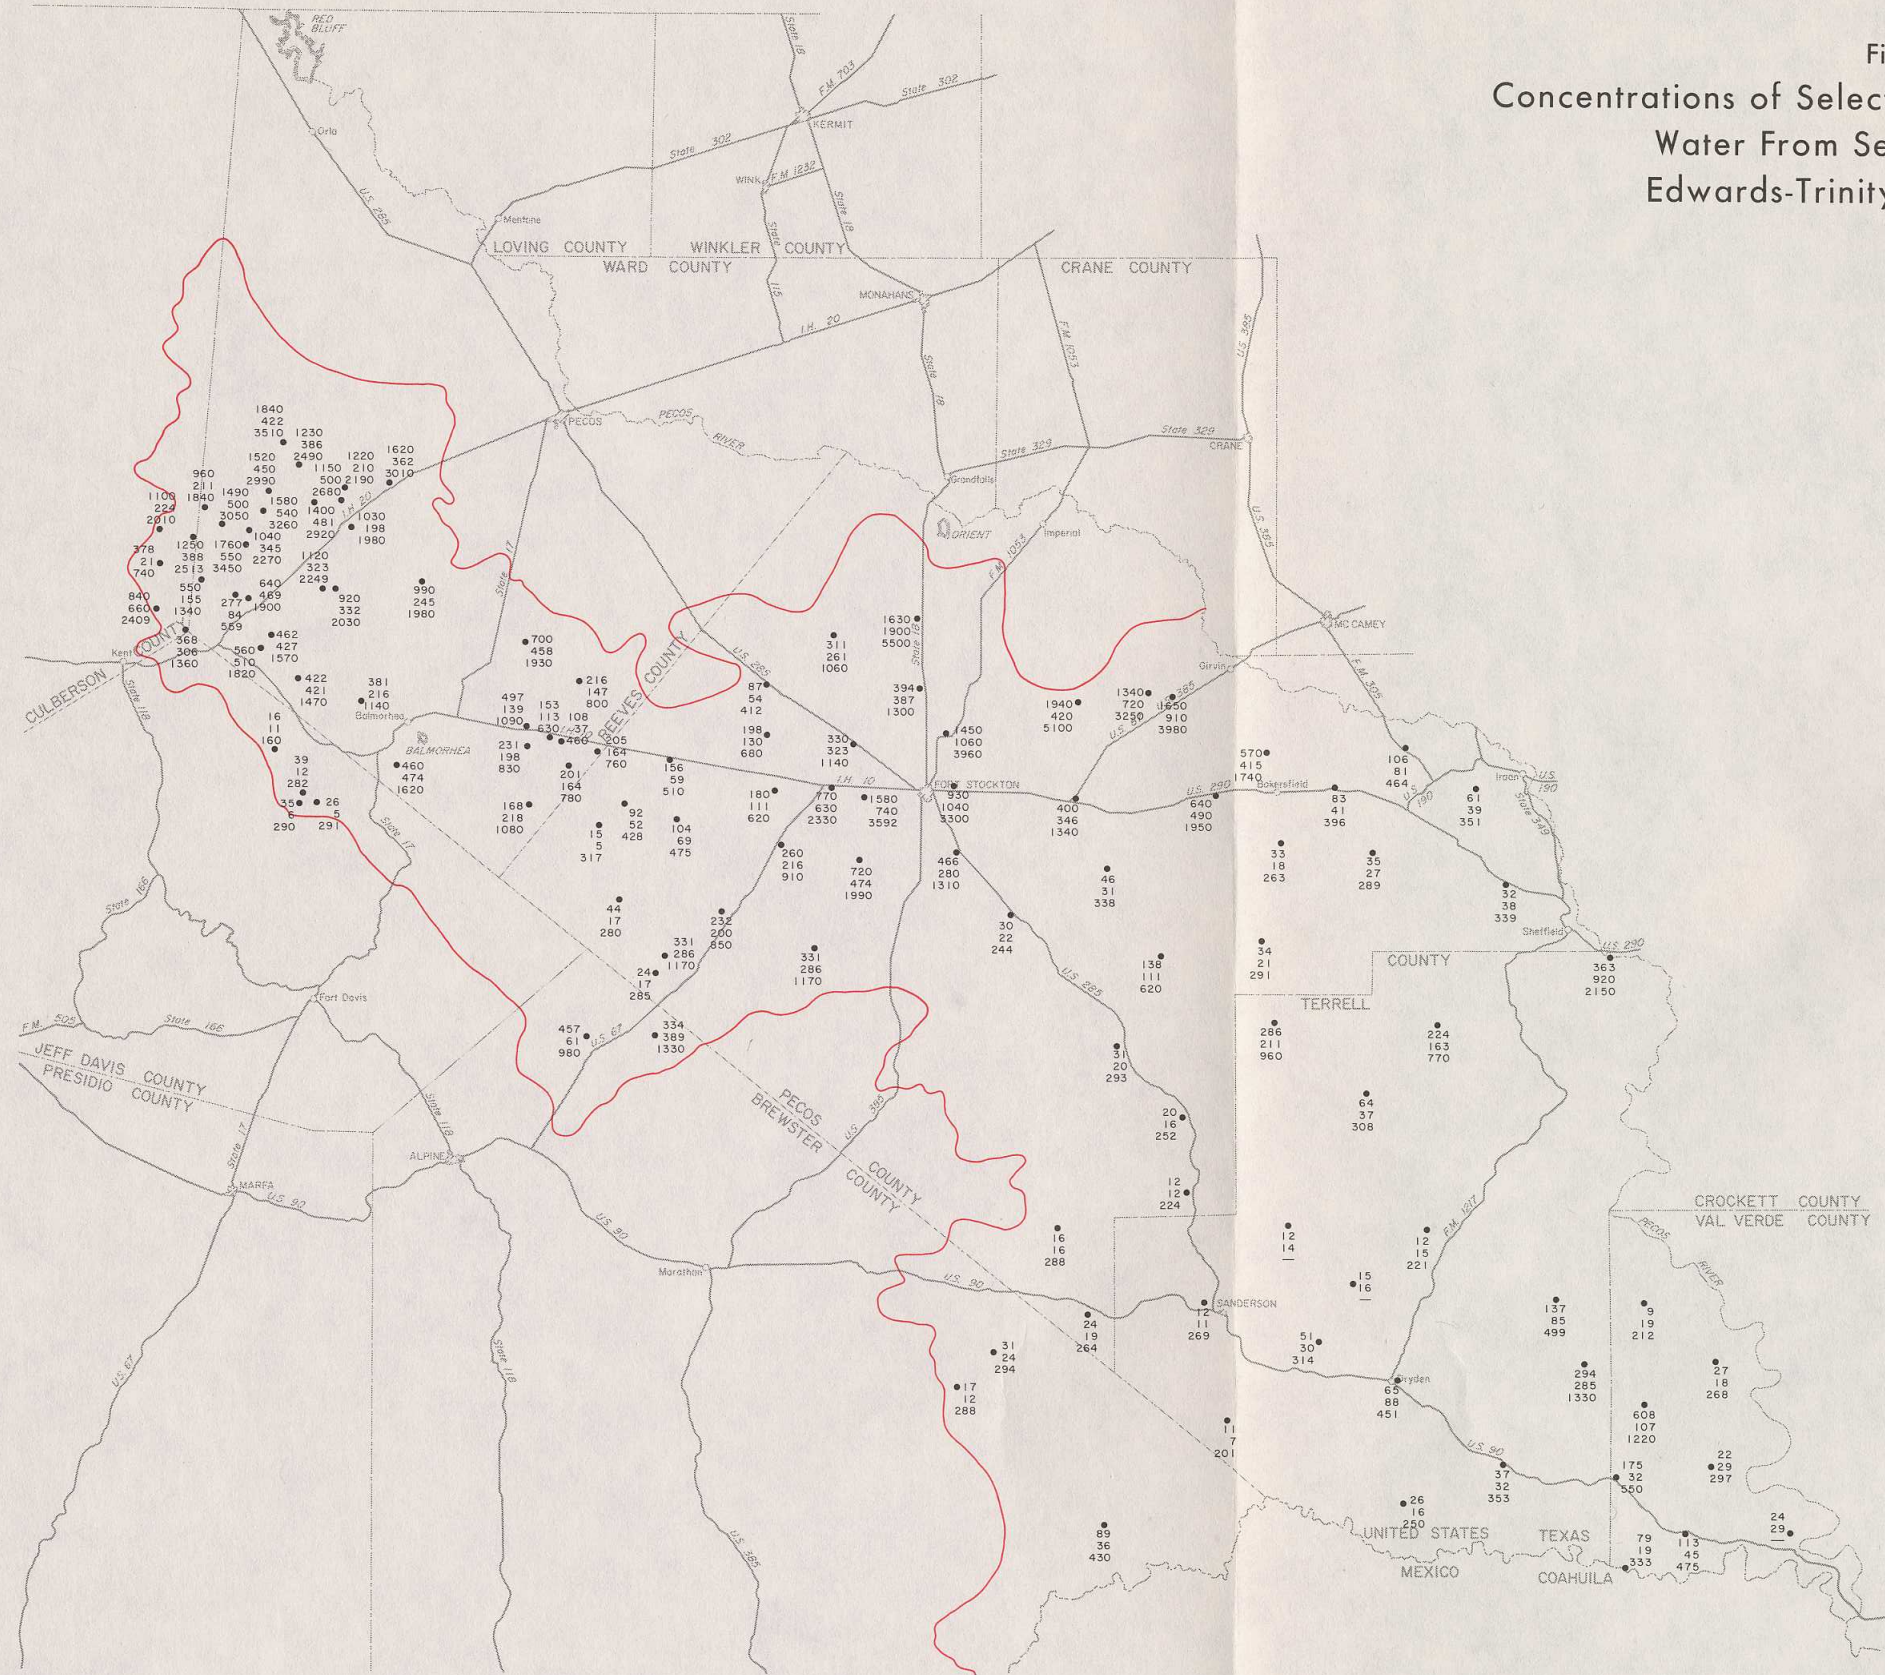

Figure 6  
 Concentrations of Selected Chemical Constituents in  
 Water From Selected Wells in the  
 Edwards-Trinity (Plateau) Aquifer

EXPLANATION

- Sampled Well
- 1340 Sulfate
- 720 Chloride
- 3250 Dissolved solids

Values are in milligrams per liter  
 Samples of water for analyses were  
 collected from 1969-75

Line showing approximate extent of the  
 Edwards-Trinity (Plateau) aquifer
