

**EXPLANATION**

● -845

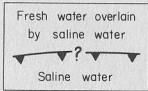

Well used for control  
Number indicates altitude of the  
base of fresh water, in feet

-800

Contour line showing approximate  
altitude of the base of  
fresh water  
Contour interval, 100 feet  
Datum is mean sea level

Approximate boundary of area where  
fresh water is overlain by saline  
water (greater than 1,000 ppm  
dissolved solids)

Approximate boundary indicating  
subsurface extent of fresh  
water (less than 1,000 ppm  
dissolved solids)

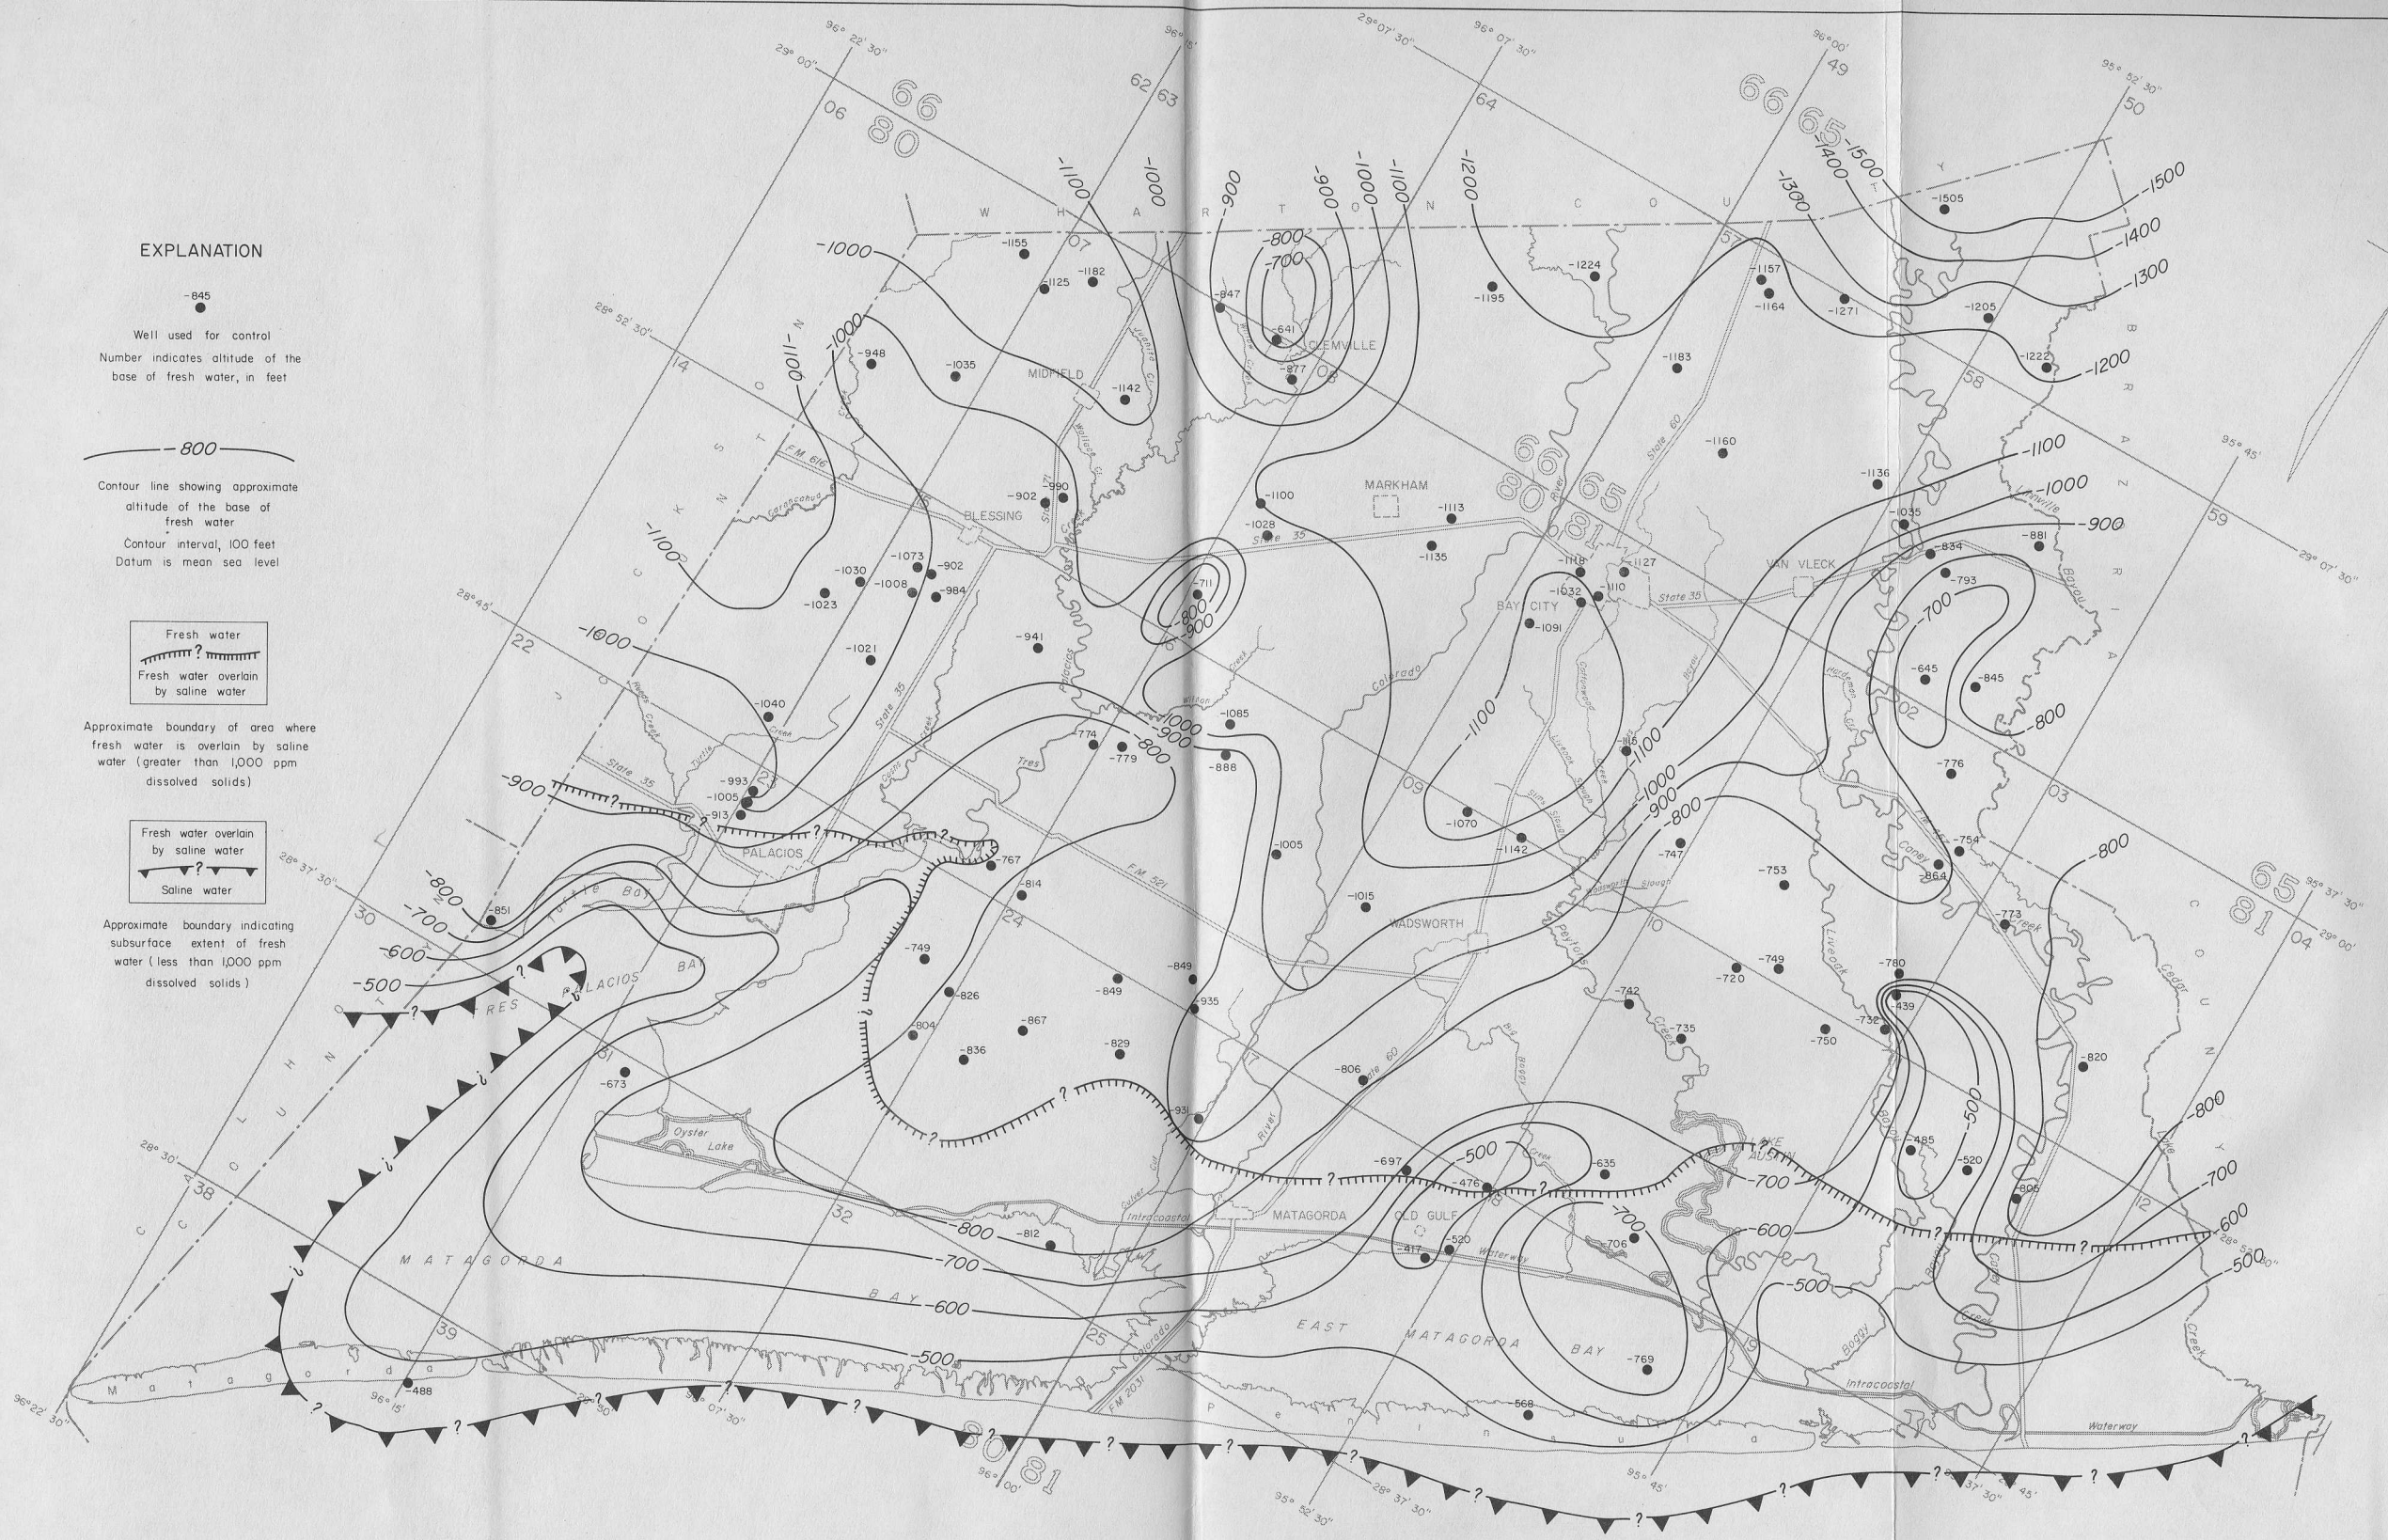

Figure 26  
Approximate Altitude of the Base of Fresh Water  
(Less Than 1,000 ppm Dissolved Solids)
