Description of Proposed Project Components

The purpose of this project is to secure and deliver treated water from the City of Waco with a lower arsenic content for dilution to less than the maximum concentration that is allowed for public water supplies (MCL). Currently public water within this project scope contains arsenic greater than the MCL of 10 ug/l, violating both TCEQ and EPA regulations.

The City of Waco has a 16-inch water main on the north side of Loop 340, approximately 12 miles from the center of the project area. The Riesel project will connect here to feed a ground storage tank and pump station. The pump station will pump the City of Waco water to the Riesel area via a 6-inch line filling four separate entities (City of Riesel, MS WSC, RMS WSC, and H&H WSC) at a pressurized rate of flow while the well pumps are also filling the tanks with the use of a regulator. This will ensure a proper mixture to lower the arsenic levels below the MCL. There will be a meter at Waco and at each delivery point. There will be a pressure tank at the pump station near Loop 340 to assist in controlling the pumps off and on cycles.

This project will lower the arsenic level and meet TCEQ and EPA regulations for the City of Riesel in addition to the Meier Settlement (MS) WSC, and Riesel-Meier Settlement (RMS) WSC. It will also bring a more reliable source of water to H&H WSC.

Emergency <i>(select all that apply)</i>	<input type="checkbox"/> Applicant/entity's water supply will last less than 180 days. <input type="checkbox"/> Applicant has received or applied for Federal emergency funding. <input checked="" type="checkbox"/> None of the above.

Agricultural Efficiency Project?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	Efficiency improvement achieved by implementing the project <i>(Please provide an attachment showing the basis for your calculation.)</i> <input type="checkbox"/> <1% <input type="checkbox"/> 10%-13.9% <input type="checkbox"/> 1%-1.9% <input type="checkbox"/> 14%-17.9% <input type="checkbox"/> 2%-5.9% <input type="checkbox"/> ≥18% <input type="checkbox"/> 6%-9.9%
---	--	---

Household Cost Factor

(Household Cost Factor for SWIFT prioritization is calculated by dividing the service area's average residential water bill by its annual median household income. For regional projects, these should represent the combined service areas of all participating entities.)

Estimated average annual residential water bill:	\$770.13	Annual Median Household Income:	\$56,264.00
